

First Last

Your Role

City, Country | REDACTED | example.com | linkedin.com/in/REDACTED | github.com/REDACTED

SUMMARY

One line on what you build, with **N years** of experience and the single most convincing number you have. Name the stack you actually own, then say what you can carry end to end. Two or three sentences; no adjectives you cannot evidence.

SKILLS

Languages	TypeScript Python SQL Bash
Frontend	React Next.js TailwindCSS
Backend	Node.js PostgreSQL REST APIs
Infrastructure	Docker CI/CD Linux

EXPERIENCE

Company Name

Mon 20XX – Present

Your Title

On-site, City

- Shipped something measurable, with the number attached.
- Owned a system end to end, from the interface down to the deploy.
- Cut a cost or a latency figure, and say by how much.

Previous Company

Mon 20XX – Mon 20XX

Your Title

Remote

- One bullet per genuinely distinct thing you did.
- Lead with the outcome, then the technology that produced it.

PROJECTS

Project Name – one-line framing

Demo | Source

React, Node.js, PostgreSQL, Docker

- What it does and who uses it, in one sentence.
- The hardest technical problem in it, and how you solved it.

EDUCATION

University Name

20XX – 20XX

Degree, Field

City, Country
